Corrections of the published maindocument and RED A

- > all data files for specific mediatypes have to be stored in the corresponding <mediatype> subdirectory in a file named <testnr>_<mediatype>.mmd: this means:
 - channel data (data structure Channel) in the <channel> subdirectory
 - static data (data structure StaticData) in the <static> subdirectory
 - movie data (camera positions) in the <movie> subdirectory
 - object data in the <object> subdirectory
- > all other data files has to be stored in the subdirectory <object> for example:
 - reference coodinate system data
 - data with the data structures 6DoF, Point, PointStdDef, MultiChannel
- > add a hint for <testnr>_Static.mmi in RED A: „for future use“
- > correct ion of the general naming rules which are are in conflict to non-channel data files
